ROUTES THAT MADE THE CUT

How these roads were found

Every route in this guide was discovered by an algorithm, not a listicle. We pulled every paved highway, primary and secondary road in each region from OpenStreetMap — 1,579 road segments — and scored each one on how much it actually turns.

$$\text{winding density} = \sum |\Delta \text{bearing}| / \text{distance} \rightarrow \text{score} = \text{density} \times \sqrt{\text{km}}$$

The metric is **winding density**: degrees of direction change per kilometre. A straight freeway scores near zero. The roads in this guide score 50–180°/km — which you feel as a corner every few hundred metres, for kilometres on end. The final score rewards roads that stay interesting over real distance, not just one good hairpin.

Then we curated. Algorithms don't know about ferry rides, oyster shacks, or which roads have logging-truck traffic — so every entry was reviewed and annotated by a human who drives these regions.

Every road here is a public road. Posted limits, oncoming traffic, cyclists and wildlife are all part of the deal — these routes are rewarding at completely legal speeds. Drive smooth, arrive happy.

01

Sea-to-Sky Highway

BC-99 · Vancouver → Whistler → Pemberton

SCENIC

**115 km**

LENGTH

52°/km

WINDING DENSITY

2h 05m

DRIVE TIME

468

REVV SCORE

The classic. Ocean cliffs out of Horseshoe Bay, granite walls past Squamish, alpine sweepers into Whistler. Rebuilt for the 2010 Olympics, so the pavement is superb. Go at sunrise on a weekday — by 10am it belongs to the tourists.

→ Start: Horseshoe Bay ferry terminal

→ Fuel: Squamish midpoint

→ Best light: golden hour over Howe Sound

02 Highway 4 — Pacific Rim

BC-4 · Port Alberni → Tofino

SPIRITED

77 km

LENGTH

70°/km

WINDING DENSITY

1h 24m

DRIVE TIME

618

REVV SCORE

77 km of old-growth rainforest, lake shores, and the tight technical section over Sutton Pass. One of the most engaging full-length drives on Vancouver Island — narrow, shaded, and relentlessly curvy. Watch for logging trucks on weekdays.

- Start: Port Alberni
- No fuel until Ucluelet junction — fill up first
- Kennedy Lake pull-outs for photos

03

Lytton–Lillooet Road

BC-12 · Fraser Canyon benchlands

SPIRITED

**43 km**

LENGTH

76°/km

WINDING DENSITY

47 min

DRIVE TIME

501

REVV SCORE

The empty one. BC-12 rides the benches above the Fraser River between two small towns most people skip. Big canyon views, almost zero traffic, and a rhythm of medium-speed corners that never quite ends. Semi-arid desert light — best in late afternoon.

- Start: Lytton
- Check conditions after heavy rain (slide-prone)
- Cell coverage is patchy — download maps offline

04

Cowichan Lake Road

Duncan → Lake Cowichan

WINDING

**27 km**

LENGTH

96°/km

WINDING DENSITY

29 min

DRIVE TIME

498

REVV SCORE

A local commuter road that happens to be a fantastic drive: farmland, forest tunnels, and a steady stream of corners along the Cowichan River valley. Low traffic outside rush hours. Pairs perfectly with Shawnigan Lake Road for a full-day Island loop.

→ Start: Duncan (Trans-Canada exit)

→ Coffee: Lake Cowichan townsite

→ Combine with Route 5 for a loop

05

Shawnigan Lake Road

Mill Bay → Shawnigan Lake loop

TECHNICAL

**18 km**

LENGTH

160°/km

WINDING DENSITY

19 min

DRIVE TIME

678

REVV SCORE

160°/km winding density — the second-highest score in this guide. Tight, tree-lined, constantly turning lakeside tarmac. This is a slow-speed technical drive: narrow lanes, cyclists on weekends, and corners that reward precision, not pace.

→ Start: Mill Bay ferry or Trans-Canada

→ Weekday mornings are quietest

→ Full lake loop adds 10 km of the same

06

Callaghan Valley Road

BC-99 junction → Whistler Olympic Park

TECHNICAL

**13 km**

LENGTH

164°/km

WINDING DENSITY

14 min

DRIVE TIME

585

REVV SCORE

A dead-end alpine climb built for the 2010 Games: wide, smooth, and empty, gaining elevation through 12.7 km of sweeping switchbacks. Because it ends at the Olympic Park, you get to drive it both ways. Highest winding density in this guide.

→ Start: 10 min south of Whistler on BC-99

→ Out-and-back — 25 km total

→ Snow closes it in winter

07 Pemberton Meadows Road

Pemberton → Upper Lillooet valley

SPIRITED

19 km

LENGTH

78°/km

WINDING DENSITY

20 min

DRIVE TIME

334

REVV SCORE

Flat valley floor, 2,000-metre walls on both sides. The corners are gentle but the setting is absurd — farmland framed by glaciers. The road quietly dead-ends up the valley, so traffic is nearly zero. A decompression drive after Sea-to-Sky.

→ Start: Pemberton village

→ No services past town

→ Best after driving BC-99 north

08

Chuckanut Drive

WA-11 · Bellingham → Burlington (USA)

SPIRITED

**30 km**

LENGTH

67°/km

WINDING DENSITY

32 min

DRIVE TIME

364

REVV SCORE

The Pacific Northwest's original scenic drive — carved into the cliffs over Samish Bay in 1896. Cross-border bonus route: 30 km of ocean-edge corners, oyster shacks, and viewpoints. Combine with a Bellingham coffee run for the perfect half-day.

→ Start: Fairhaven district, Bellingham

→ US border: bring passport

→ Oyster stop: Taylor Shellfish Farms

09

Fulford–Ganges Road

Salt Spring Island · ferry required

WINDING

**14 km**

LENGTH

107°/km

WINDING DENSITY

15 min

DRIVE TIME

398

REVV SCORE

The hidden gem that algorithms miss and locals love. Take the ferry from Swartz Bay, roll off at Fulford Harbour, and carve 14 km of hilly, winding island road to Ganges village. The ferry ride makes it an event; the Saturday market makes it a day.

→ Ferry: Swartz Bay → Fulford (35 min)

→ Saturday market in Ganges

→ Island speed limits are low — cruise it

10

Squamish Valley Road

Squamish → Upper Squamish valley

SPIRITED

**22 km**

LENGTH

70°/km

WINDING DENSITY

25 min

DRIVE TIME

331

REVV SCORE

Turn off the tourist highway and follow the Squamish River into the mountains. 22 km of river-valley corners that get wilder and emptier the further you go. Pavement ends eventually — turn around there. Eagles in winter, alpenglow in summer.

→ Start: BC-99 north of Squamish

→ Pavement ends ~22 km in

→ Winter: bald eagle viewing area
