# Hidden Winding Roads of the Pacific Northwest

10 driving routes scored by algorithm, not opinion.

British Columbia & Washington · Vol. 1

**492 km**

TOTAL ROUTE LENGTH

**1,579**

WAYS ANALYZED

**10**

ROUTES THAT MADE THE CUT

# How these roads were found

Every route in this guide was discovered by an algorithm, not a listicle. We pulled every paved highway, primary and secondary road in each region from OpenStreetMap — 1,579 road segments — and scored each one on how much it actually turns.

**Winding density:** degrees of direction change per kilometre. A straight freeway scores near zero. The roads in this guide score 66–100°/km — which you feel as a corner every few hundred metres, for kilometres on end.

Then we curated. Algorithms don't know about ferry rides, oyster shacks, or which roads have logging-truck traffic — so every entry was reviewed and annotated with local research.

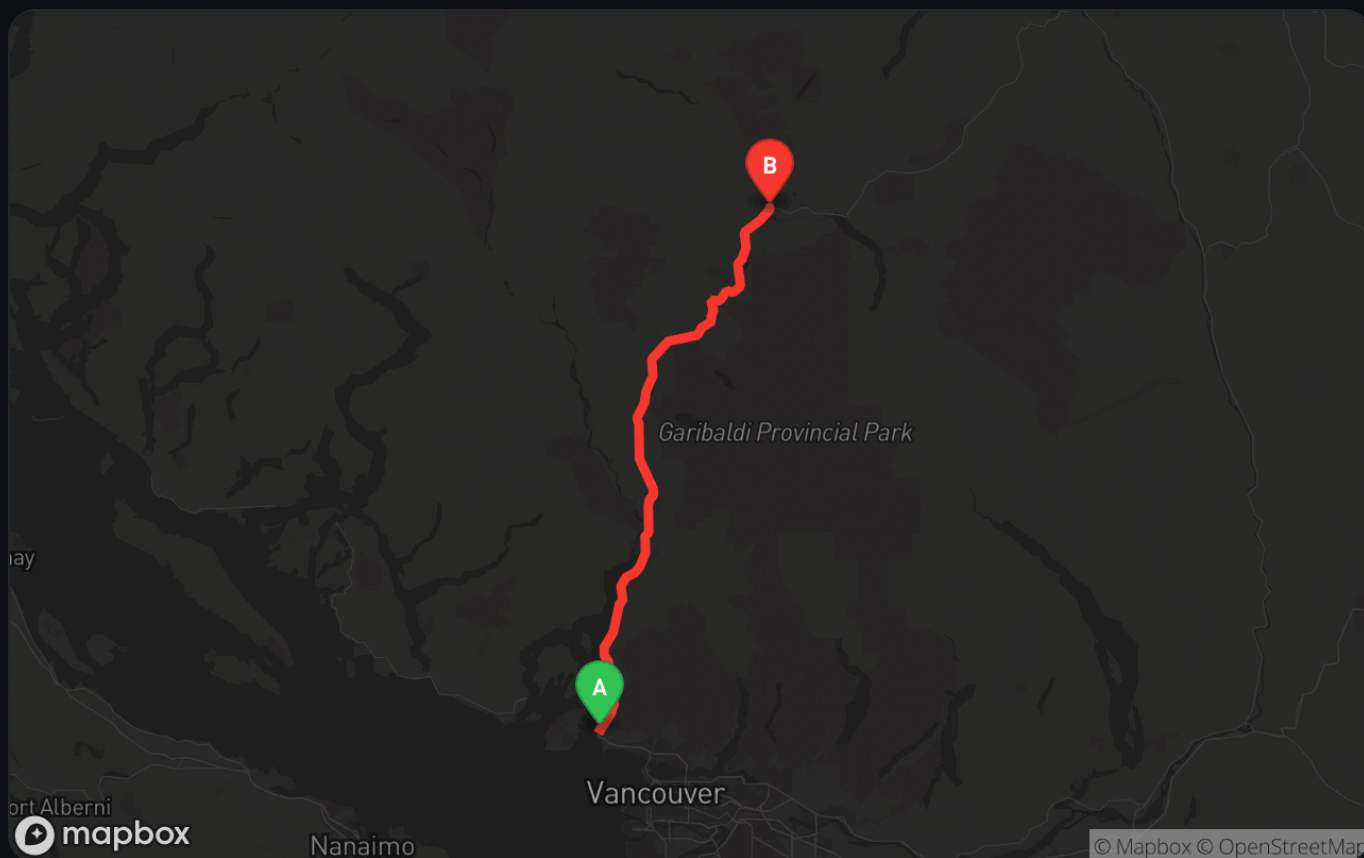

Every road here is a public road. Posted limits, oncoming traffic, cyclists and wildlife are all part of the deal — these routes are rewarding at completely legal speeds. Drive smooth, arrive happy.

01

# Sea-to-Sky Highway

BC-99 · Horseshoe Bay → Whistler → Pemberton

SPIRITED

**136 km**

LENGTH

**79°/km**

WINDING DENSITY

**1h 57m**

DRIVE TIME

**707**

REVV SCORE

The classic. Ocean cliffs out of Horseshoe Bay, granite walls past Squamish, alpine sweepers into Whistler. Rebuilt for the 2010 Olympics, so the pavement is superb. Go at sunrise on a weekday — by 10am it belongs to the tourists.

→ Start: Horseshoe Bay ferry terminal

→ Fuel: Squamish midpoint

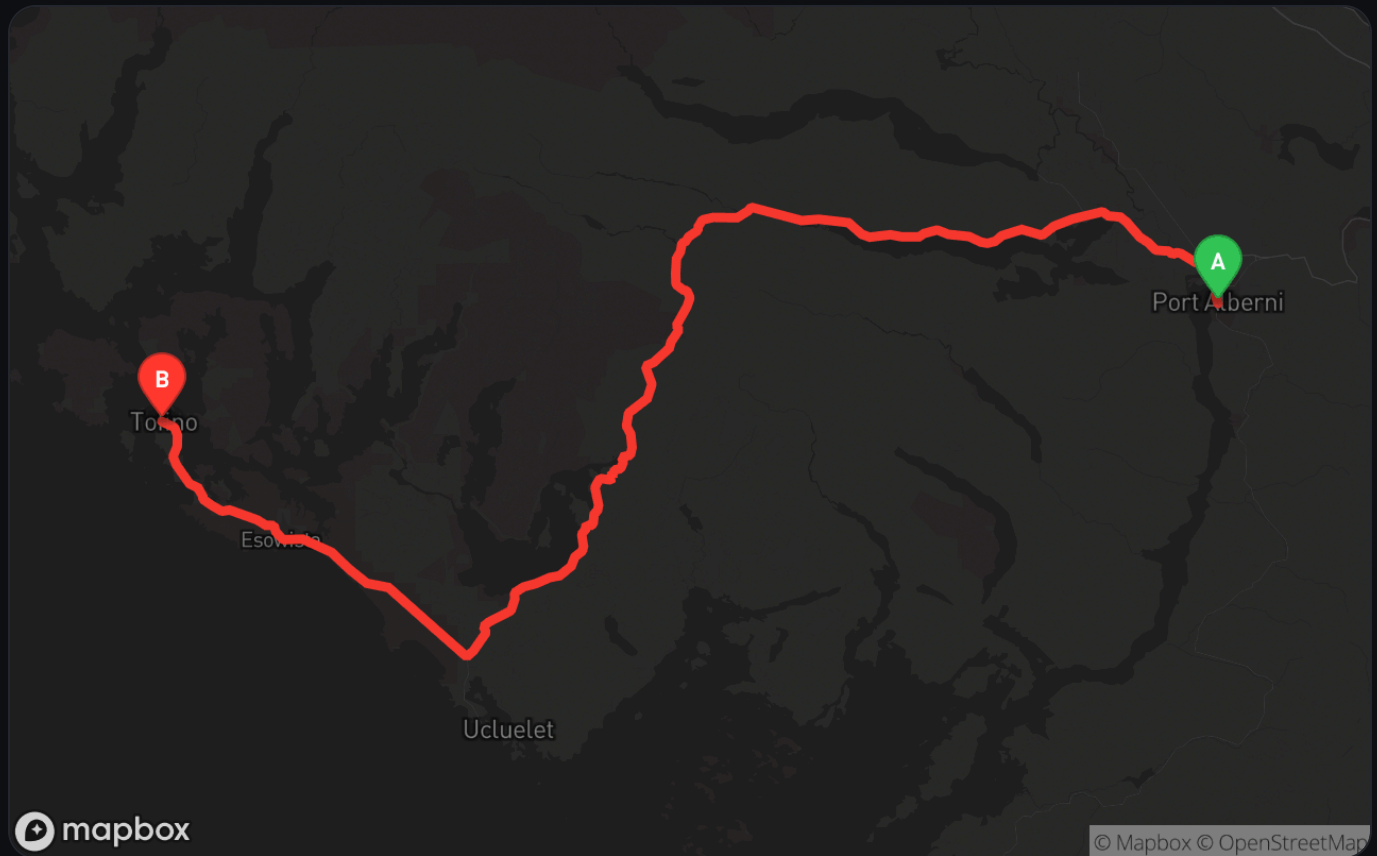

→ Best light: golden hour over Howe Sound

[Open in Google Maps ↗](#)

## 02 Highway 4 — Pacific Rim

BC-4 · Port Alberni → Tofino

SPIRITED

**126 km**

LENGTH

**81°/km**

WINDING DENSITY

**2h 00m**

DRIVE TIME

**721**

REVV SCORE

Old-growth rainforest, lake shores, and the technical section over Sutton Pass. One of the most engaging full-length drives on Vancouver Island — narrow, shaded, and relentlessly curvy. Watch for logging trucks on weekdays.

→ Start: Port Alberni

→ No fuel until Ucluelet junction — fill up first

→ Kennedy Lake pull-outs for photos

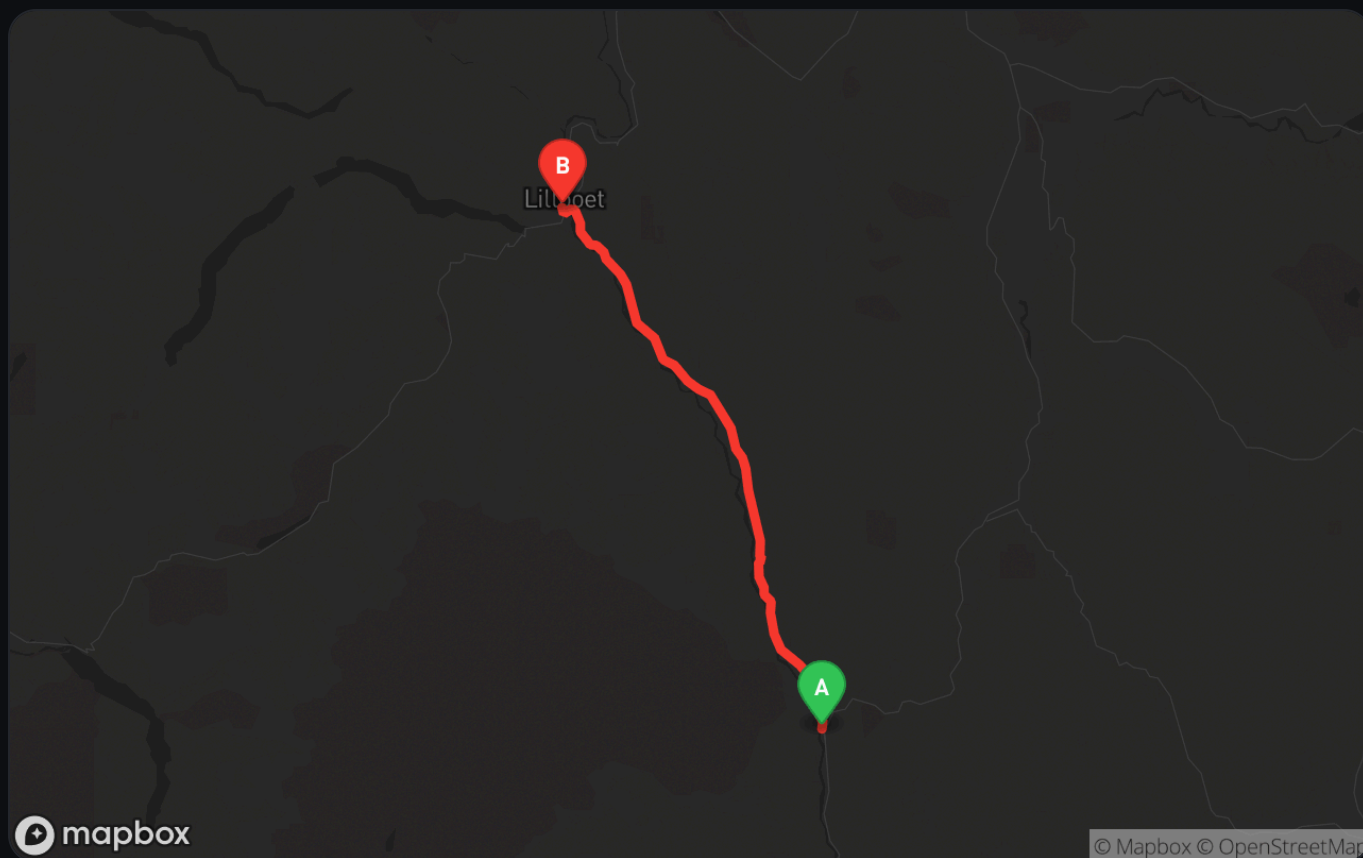

[Open in Google Maps ↗](#)

03

## Lytton–Lillooet Road

BC-12 · Fraser Canyon benchlands

SCENIC

**63 km**

LENGTH

**68°/km**

WINDING DENSITY

**57 min**

DRIVE TIME

**540**

REVV SCORE

The empty one. BC-12 rides the benches above the Fraser River between two small towns most people skip. Big canyon views, almost zero traffic, and a rhythm of medium-speed corners that never quite ends. Semi-arid desert light — best in late afternoon.

→ Start: Lytton

→ No fuel or services in Lytton (still rebuilding after the 2021 fire) — fill up in Hope or Lillooet

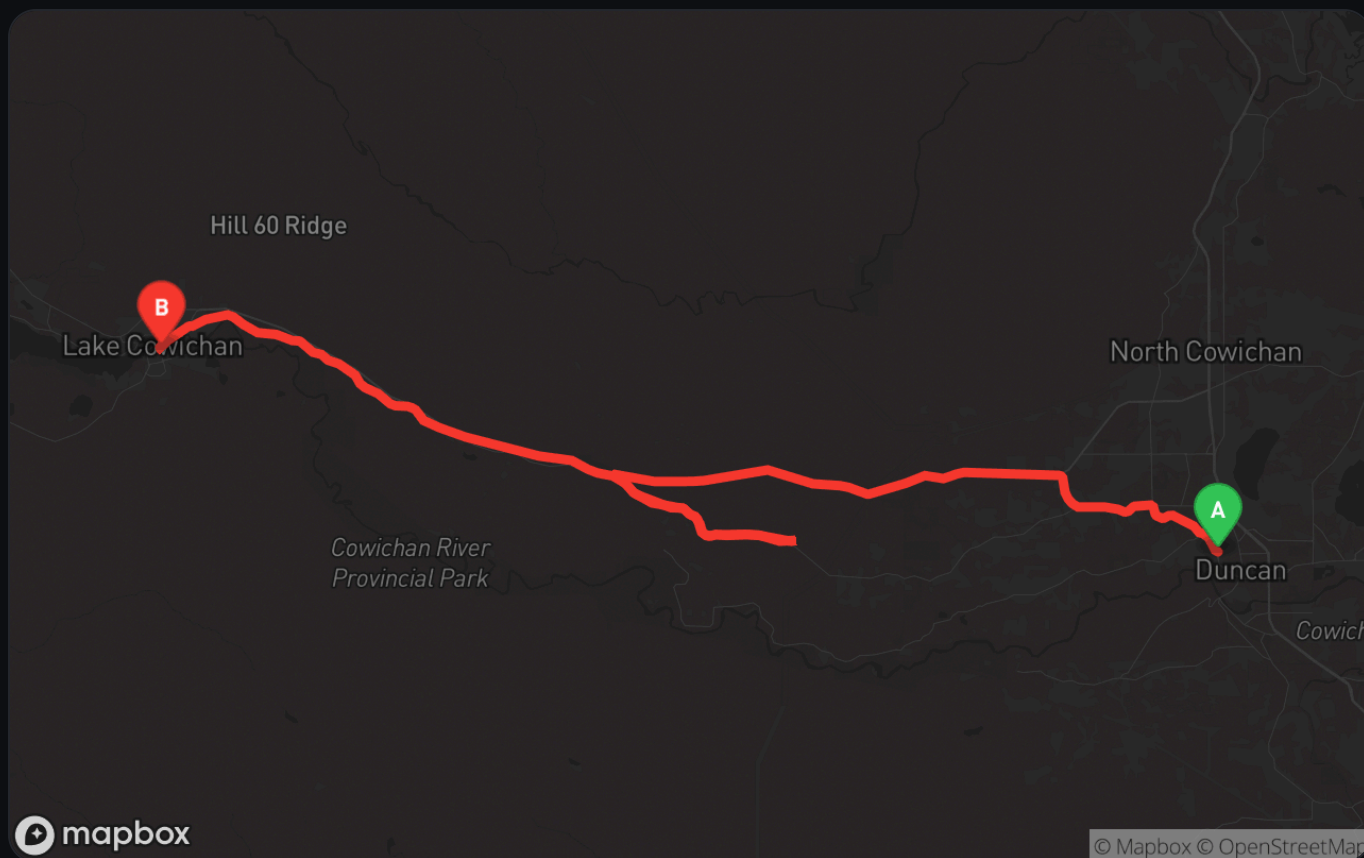

→ Cell coverage is patchy — download maps offline

[Open in Google Maps ↗](#)

## 04 Cowichan Lake Road

Duncan → Lake Cowichan

SPIRITED

**38 km**

LENGTH

**82°/km**

WINDING DENSITY

**43 min**

DRIVE TIME

**508**

REVV SCORE

A local commuter road that happens to be a fantastic drive: farmland, forest tunnels, and a steady stream of corners along the Cowichan River valley. Low traffic outside rush hours. Pairs perfectly with Shawnigan Lake Road for a full-day Island loop.

→ Start: Duncan (Trans-Canada exit)

→ Coffee: Lake Cowichan townsite

→ Combine with Route 5 for a loop

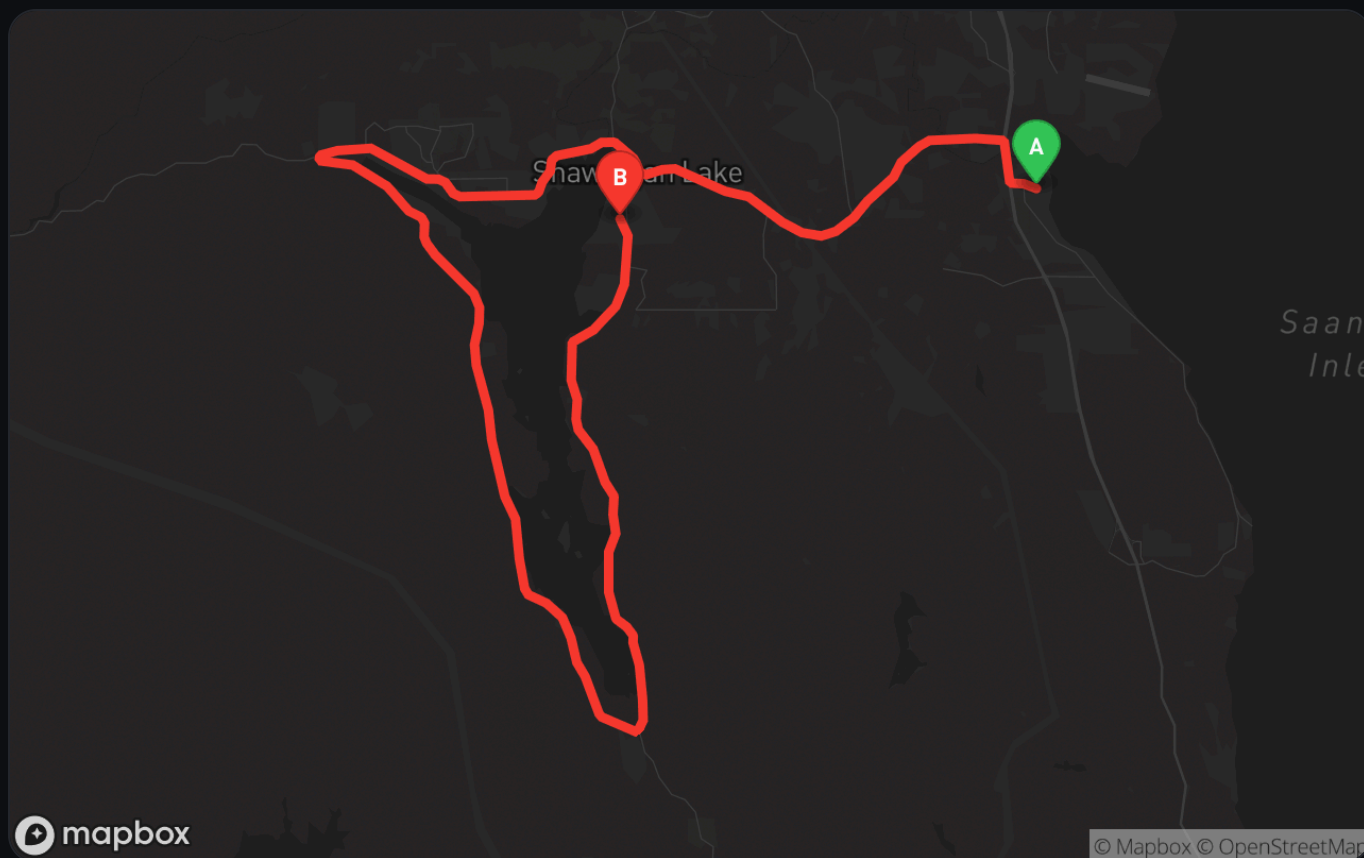

[Open in Google Maps ↗](#)

05

# Shawnigan Lake Road

Mill Bay → Shawnigan Lake loop

WINDING

**27 km**

LENGTH

**96°/km**

WINDING DENSITY

**33 min**

DRIVE TIME

**500**

REVV SCORE

Tight, tree-lined, constantly turning lakeside tarmac. This is a slow-speed technical drive: narrow lanes, cyclists on weekends, and corners that reward precision, not power.

→ Start: Mill Bay ferry or Trans-Canada

→ Weekday mornings are quietest

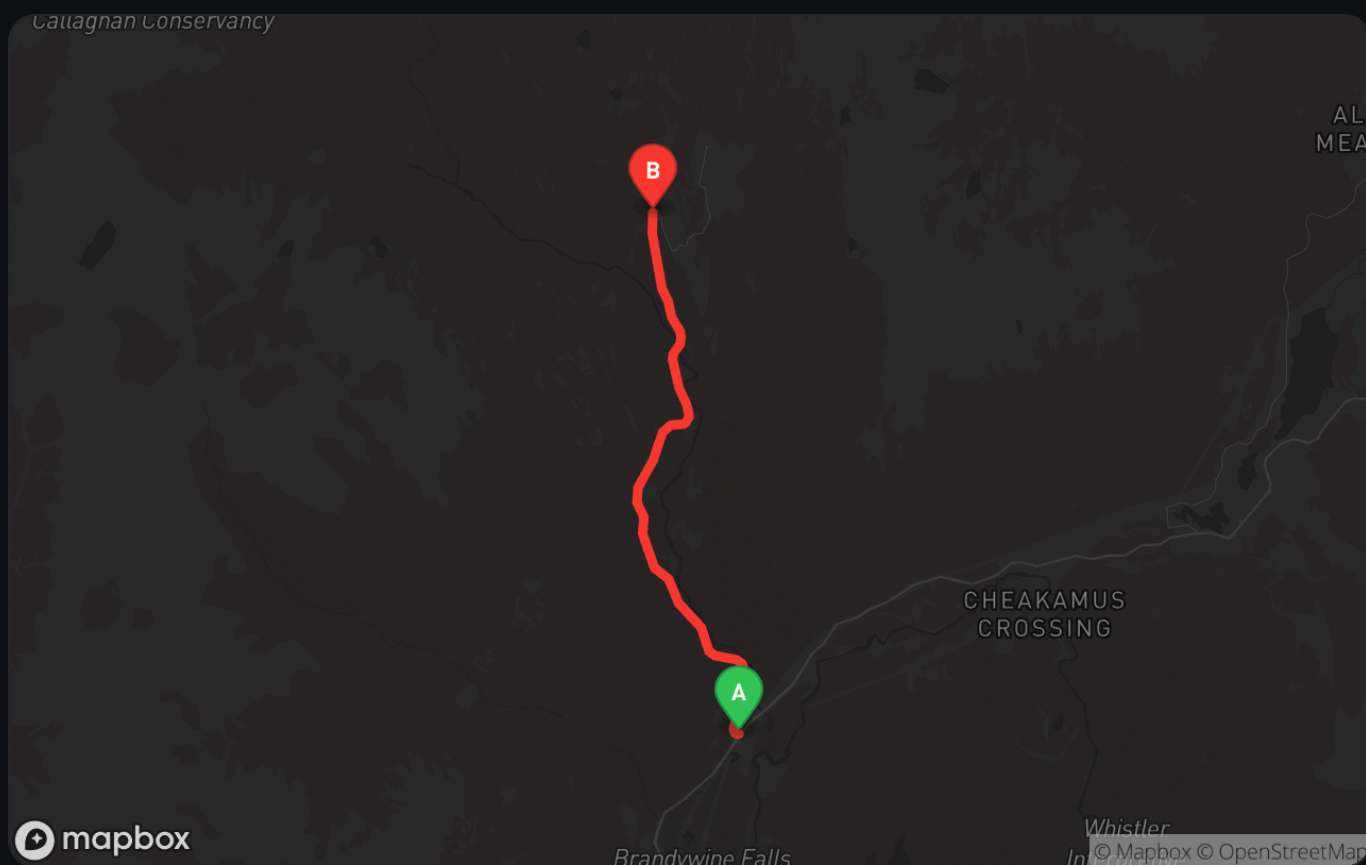

→ Full lake loop included — the route circles the lake

## 06 Callaghan Valley Road

BC-99 junction → up the Callaghan valley

TECHNICAL

**10 km**

LENGTH

**99°/km**

WINDING DENSITY

**18 min**

DRIVE TIME

**310**

REVV SCORE

A dead-end alpine climb built for the 2010 Games: wide, smooth, and empty, gaining elevation through winding switchbacks. It dead-ends up the valley, so you get to drive it both ways — one of the densest corner counts in this guide.

→ Start: 10 min south of Whistler on BC-99

→ Out-and-back — about 19 km total

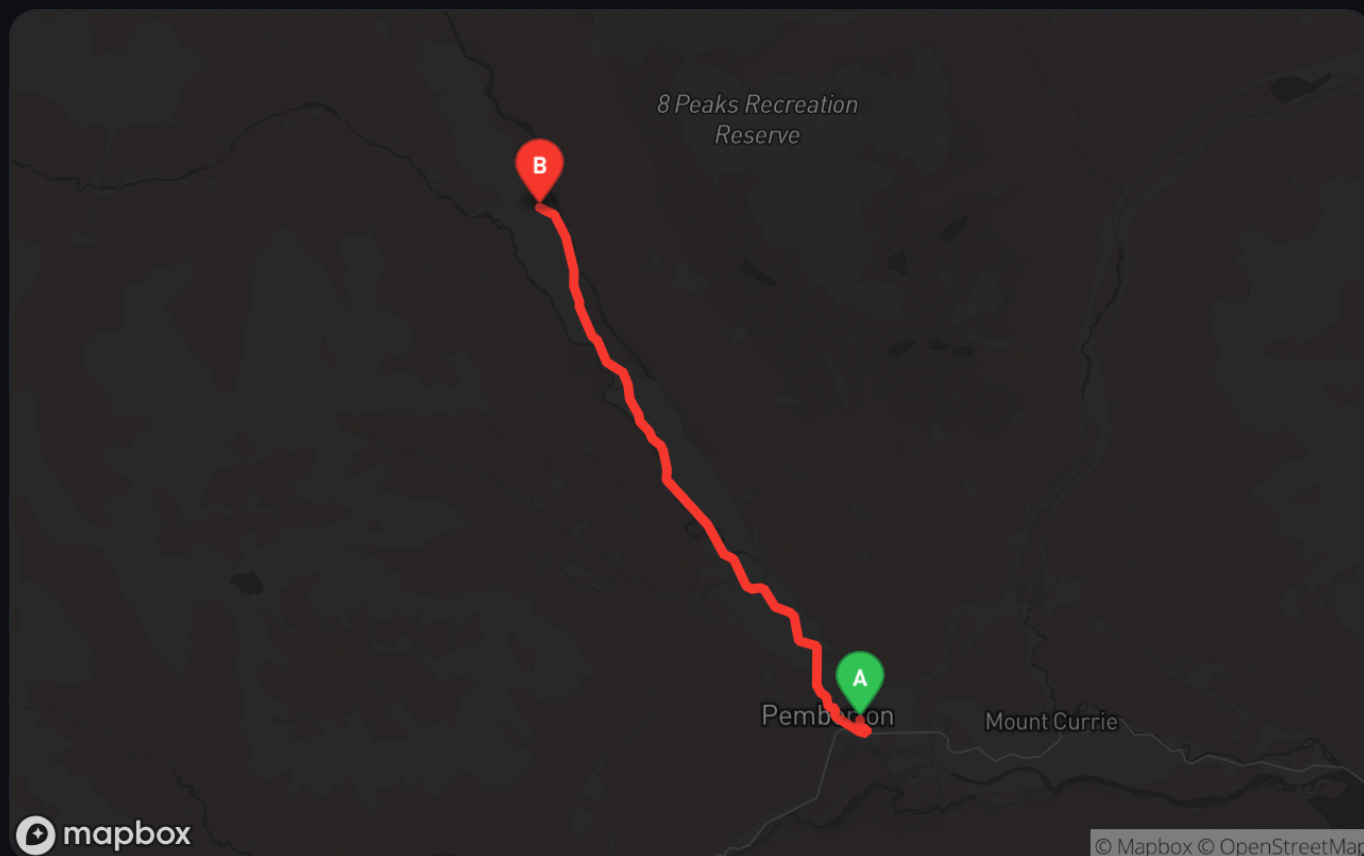

→ Snow closes it in winter

[Open in Google Maps ↗](#)

# 07 Pemberton Meadows Road

Pemberton → Upper Lillooet valley

WINDING

**19 km**

LENGTH

**96°/km**

WINDING DENSITY

**34 min**

DRIVE TIME

**421**

REVV SCORE

A flat valley floor with 2,000-metre walls on both sides. Corner after flowing corner past farmland framed by glaciers — the setting is absurd. The road quietly dead-ends up the valley, so traffic is nearly zero. A decompression drive after Sea-to-Sky.

→ Start: Pemberton village

→ No services past town

→ Best after driving BC-99 north

08

# Chuckanut Drive

WA-11 · Bellingham → Burlington (USA)

SCENIC

**34 km**

LENGTH

**66°/km**

WINDING DENSITY

**39 min**

DRIVE TIME

**388**

REVV SCORE

The Pacific Northwest's original scenic drive — carved into the cliffs over Samish Bay in 1916. Cross-border bonus route: ocean-edge corners, oyster shacks, and viewpoints. Combine with a Bellingham coffee run for the perfect half-day.

→ Start: Fairhaven district, Bellingham

→ US border: bring passport

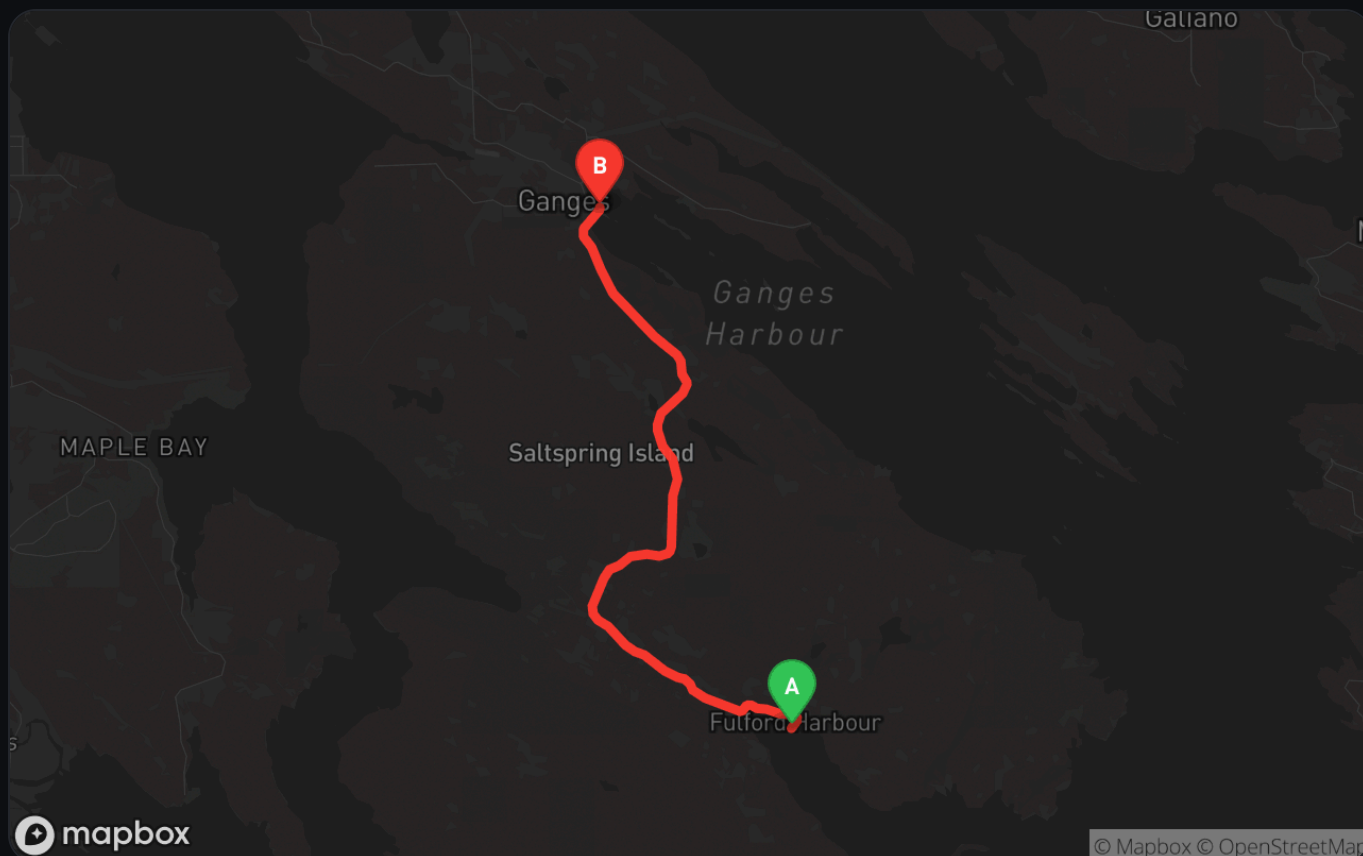

→ Oyster stop: Taylor Shellfish Farms

[Open in Google Maps ↗](#)

# 09 Fulford–Ganges Road

Salt Spring Island · ferry required

WINDING

**14 km**

LENGTH

**91°/km**

WINDING DENSITY

**18 min**

DRIVE TIME

**342**

REVV SCORE

The hidden gem that algorithms miss and locals love. Take the ferry from Swartz Bay, roll off at Fulford Harbour, and carve winding island roads to Ganges village. The ferry ride makes it an event; the Saturday market makes it a day.

→ Ferry: Swartz Bay → Fulford (35 min)

→ Saturday market in Ganges

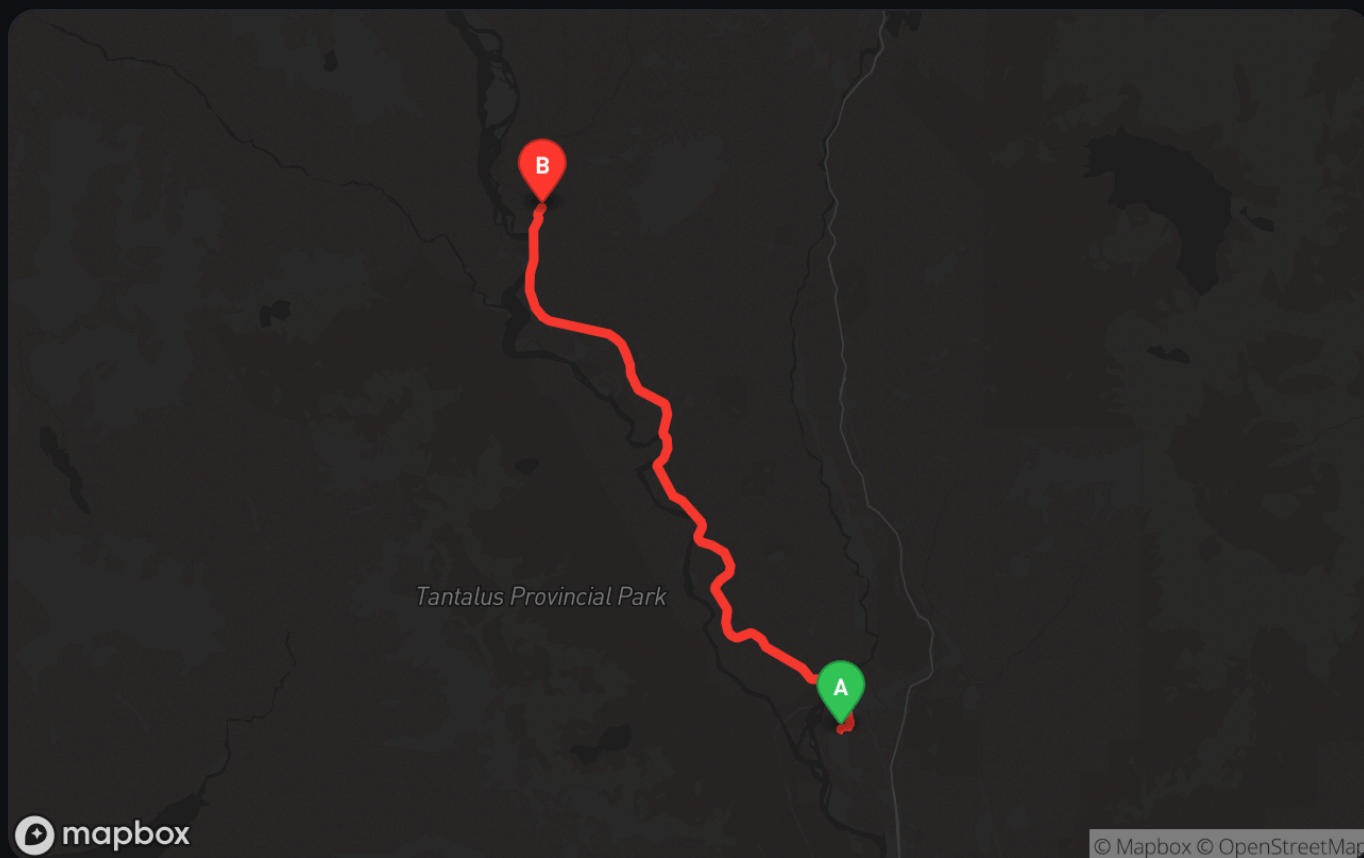

→ Island speed limits are low — cruise it

[Open in Google Maps ↗](#)

# 10 Squamish Valley Road

Squamish → Upper Squamish valley

TECHNICAL

**24 km**

LENGTH

**100°/km**

WINDING DENSITY

**39 min**

DRIVE TIME

**489**

REVV SCORE

Turn off the highway and follow the Squamish River into the mountains. River-valley corners that get wilder and emptier the further you go — the highest winding density in this guide. The route ends where the pavement does; turn around there. Eagles in winter, alpenglow in summer.

→ Start: BC-99 north of Squamish

→ Pavement ends in the upper valley

→ Winter: bald eagle viewing area
